Suraj Jena

703-980-2927 | Austin, TX | github.com/dunkelhaus
jena.suraj.k@gmail.com | linkedin.com/in/skjena

Skills

Core Competencies: Machine Learning, Microservices, Event-Driven Architectures
Cloud (AWS): Lambda, IoT Core, API Gateway, SQS/SNS, DynamoDB, SageMaker, Bedrock
Languages: Python, Go, JavaScript, bash, C++, R, Java
Libraries & Frameworks: PyTorch, Pandas/Numpy, Keras, Node.js
Tools & Protocols: MQTT, Concourse, Datadog, Jupyter Lab, Neovim, Git, Postman/Bruno

Experience

Software Engineer 3 — Comcast Mar 2025 – Present
Austin, TX

- **Leading a tiger team on a machine learning initiative** analyzing smart home device behavior to generate user activity insights, including both **LLM-generated summaries** and **predictive modeling of device behavior**.
- **Defined stronger coding best practices** for use within the team to **improve PR quality and reduce code duplication**, and helped incorporate the proposed standards.
- **Frequently present on new technologies and topics** to adjacent teams and guide engineering decisions.

Software Engineer 2 — Comcast Aug 2023 – Mar 2025
Austin, TX

- **Published an internal article** on a more efficient time-series data model, which **was adopted as a cross-team initiative** to revise the current data storage solution **to better suit future ML initiatives**.
- **Led refactoring efforts across 80+ microservices** to improve code quality and encourage better PR practices.
- **Acted as a Subject Matter Expert (SME)** for the gateway swap feature, coordinating fixes across **more than six teams to improve a critical customer-facing workflow**.

Software Engineer 1 — Comcast Sep 2021 – Aug 2023
Austin, TX

- **Drove fixes to the regression test pipeline using a custom DSL "Plax"**, eventually **guiding the rest of the team** on its concepts.
- **Developed a "highlights" feature** for the entertainment side of the business using remote button presses to determine popular hotspots in videos as part of an internal cross-organization mentorship program; **presented at the company-wide Expo to senior leadership**.

Machine Learning Engineer — Wells Fargo (Persistent Systems) Jun 2019 – Jul 2020
San Francisco, CA

- **Led Python refactoring for chatbot intent classification**, transitioning from a Java-based to Python-based ML pipeline.
- Analyzed and provided **intent classification model explainability with LIME** for stakeholders.

Software Developer — Persistent Systems Mar 2019 – Jun 2019
Dublin, OH

- Worked with presales engineers **in close contact with potential clients** to demo OutSystems as a vendor for the tool.

- Each demo involved a **2-3 week proof-of-concept development period** for a complete system, to demonstrate the potential development speedup to clients.

Software Developer Intern — Persistent Systems Jan 2019 – Mar 2019
Dublin, OH

- **Trained other interns** on the tool Persistent acted as a vendor for, i.e. OutSystems.

Education

B.S. Computer Science — University of California, Davis Jun 2018

Certifications & Awards

- **AWS Certified Cloud Practitioner**
- **Deep Learning Specialization** (Sequence Models, Hyperparameter Tuning, Neural Networks)
- **Mobile App Development Award** from CITRIS
- **Open Source Software Development Award** from the Virginia TSA
